This program presents alcohol and drug prevention information that covers on-and off-campus policy & applicable laws, effects of alcohol on our bodies and brains, risk management, debunking expectations and myths about college drinking, resources available to USD students, as well as some bystander training information regarding alcohol poisoning. This program reaches 800+ students each year and is incentivized with prizes, cups, and other treats. There is a pre- and post-test that measures students' perceptions about drinking norms before and after the program. Survey results show that students consistently change students' attitudes and perceptions.

## Disciplinary Sanctions for Violations of the Student Code of Conduct

In accordance with the Drug Free Schools and Communities Act, the Student Code ([SDBOR 3:4](#)) prohibits, “the unauthorized manufacture, sale, possession, use, or consumption of alcohol, marijuana, or controlled substances by students.” The Student Code also outlines the procedures for which due process is afforded to students. Allowable sanctions for violating the Student Code range from a warning to expulsion, depending on the severity of the event. Action by the South Dakota Board of Regents in 2017

removed mandatory minimum sanctions for alcohol and other drug offenses, but the following chart outlines sanctions regularly assessed for students found responsible for violating the Student Code.

### Common Conduct Sanctions for Student Alcohol & Drug Violations

Disciplinary sanctions range from warning to termination.

### Clery Act Reportable Disciplinary Referrals

The table below presents the data for liquor and drug law violations and referrals as reported in USD’s Annual Security Report in compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act. The chart below is for the USD main campus. The USD Sioux Falls campus has not reported any liquor law or drug law violations during 2020 or 2021.

## Alcohol & Other Drug Referrals to Student Rights & Responsibilities

The Office of Student Rights & Responsibilities (SRR) receives referrals for allegations of violations of the Student Code (SDBOR 3:4) as well as violations of law. These referrals may come from any member of the campus community, but largely these notices stem from the University Police Department and reports from University Housing staff. Per the Student Code, the threshold used for student conduct cases is the preponderance of evidence standard. Not all referrals result in findings of responsibility; without a finding of responsibility, no sanctions are applied.

## Program Strengths & Challenges

- Program Strengths & Opportunities
  - Though mentioned previously in this review, one of the University of South Dakota’s greatest assets in providing alcohol and other drug assessments and programs is the Student Counseling Center’s chemical dependency program accreditation through the South Dakota Division of Alcohol and Drug Abuse. This is worth repeating as the USD Student Counseling Center is the only university center in the state (and one of few nationally) to have such distinction. With the dedicated staff of the Student Counseling Center, students at the University of South Dakota have access to quality care to address their chemical dependencies.
  - The University Police Department and the Division of Student Services, particularly University Housing, have a strong partnership. University Housing staff and UPD officers conduct regular rounds of residential facilities to ensure resident safety and

compliance with applicable Federal and State laws as well as University policy. Violations of law and student code are addressed and referred for adjudication through the Courts and/or the Office of Student Rights & Responsibilities.

- Results from the Core Alcohol and Drug Survey indicate that students were aware of USD's alcohol and drug policies (94.2%) and believed they were enforced (79.5%).
  - The Programming Committee connects departments from across campus to strategically plan and organize campus events so that students have safe, fun, and healthy alternatives to actively engage in every day on the USD campus.
  - The Wellness Coalition works towards helping create an awareness of expectations, norms, and real facts about alcohol and drug consumption on campus with a large body of campus partners. Through increasing the perception of harm, this groups continues to help change attitudes about excessive drinking and substance use on the USD campus.
- Program Challenges
    - As demonstrated through the University Prevention Summary Report, pre- and post-test surveys of student participants in alcohol and drug programs indicate the interventions have a noticeable impact of their understanding of chemical dependency. Most student participants were placed in these interventions upon referral from the Office of Student Rights and Responsibilities. A continual challenge is educating students of services and program offerings prior to their involvement in situations that lead to a conduct referral. This is further complicated as the counseling center is often at (or beyond) capacity.
    - In 2020, the voters of South Dakota passed Initiated Measure 26 and approved medical cannabis. Since then, the South Dakota Medical Cannabis program has been launched and is operational. The Departments of Health and Education have delivered a regulatory program that ensures the safety of patients, students, and the public in this new industry.
    - Recreational marijuana use and possession remain illegal in South Dakota. The campus, local law enforcement, and the Clay County State's Attorney's Office continue to enforce violations of recreational marijuana laws, and marijuana remains prohibited on the USD campus.

## Recommendations

- The University of South Dakota will continue to offer and expand alcohol and drug education opportunities and modify programs based on assessments and best practices.
- Work with the Office of Institutional Research to Offer the SUIC/Core Institute Alcohol and Drug Survey Long Form instrument to a larger sample of students to assess the USD climate related specifically to alcohol and other drugs.
